ERIBA

A Product of the HYMER Group

Some vehicles illustrated are fitted with optional equipment, which is subject to surcharge. Details relating to delivery, appearance, performance, measurements and weights are correct at the time of going to press, based on the British Standards for sale and registration in United Kingdom. Some vehicles depicted may not be registrable in all European countries. Your ERIBA dealer will gladly give you information about standard models in your own country and the registration laws. Variations due to manufacturing tolerances are possible and allowed. ERIBA reserves the right to make changes in design or technical improvements without prior notice.

Eriba-Touring 2004

Eriba-Touring

The extraordinary attraction of this legendary range is based upon the unusual. Concept: stability, compact, low profile, perfectly aerodynamic and superb towing characteristics.

The unique construction principle of the tubular steel frame structure that makes up the skeleton of the Eriba Touring caravans has proved itself over the decades.

The elevating roof design, lowered for touring, ensures the caravans low profile and unrivalled road holding qualities.

Eriba-Touring

Small Exterior – Spacious Interior
The ERIBA Touring range is again and again admired for the size of their interior layouts, unexpectedly larger than the Touring models' deceptively compact exterior would suggest. All the necessities for comfortable living contained in a compact and functional unit.

On this page the new, attractive interior layout that is offered in the Troll 555 GT, can be seen. The rounded "shell shaped" table is moveable and rests on a pedestal.

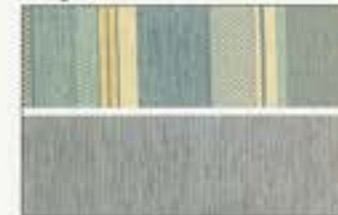

ERIBA Touring

An upholstery of your choice

Avignon

Stockholm

A "petite" tourer that makes a BIG impression!

The Touring range, from the small Puck to the largest Troll, offers a total of 29 different layouts. The Touring range excels itself through its commitment to functionality. The superfluous has no place here!

The Touring-Fifty's

A Homage to the Fifty's

The 1950's were the era of Rock 'n' Roll. It was also the period in which the first ERIBA Touring caravans left the production line.

The Touring-Fifty's are homage to this time. With style elements typical of the era, that will bring back pleasant memories, merged seamlessly with the advances of today's technology.

The ERIBA legend lives on, with the attributes that have marked out the Touring models since their inception: compact and low profile with outstanding towing characteristics. The unique tubular steel frame structure, a concept taken from the aeronautics industry, has already proved itself over five decades.

Touring Fifty's: Today's technology matched with Fifty's style continues the legendary ERIBA success story.

As with the models in the Touring range, the Fifty's possess all the equipment to provide you with comfortable living: a compact kitchen area with a round sink, worktop mounted tap and flush glass covered hob, 3 way fridge and heater and are available in two different layouts.

Indeed ... Not Like Any Other!

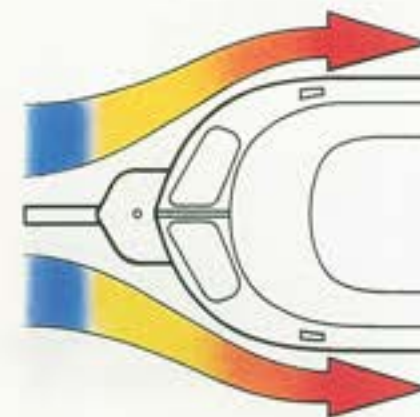

Forty-five years ago the first ERIBA caravan was conceived, built around a revolutionary concept and perfected by an aeronautics engineer. The tubular steel frame structure (as shown opposite) which makes up the skeleton of an ERIBA Touring caravan, has proved itself over the decades. It is yet to be superseded as one of the best solutions ever designed to give rigidity to the whole unit.

This unique design element allows for an aerodynamic shape but also an optimum weight ratio. This gives every ERIBA Touring caravan incomparable road holding properties.

The tubular steel frame structure is insulated to ensure no cold spots to attract condensation on the inner panel, and is used to mount all the furniture inside the caravan, as well as an anchor point for any external accessories which are to be fixed to the caravan. This ensures a very long life. There are enough veteran ERIBA's still on the road today to prove it!

Shown to the right is an exterior view of the Puck 120 GT, featuring the tow bar fairing, front panel stone guard and alloy wheels present on all Touring GT models.

The exterior of the GT models combines beautifully with the interiors in which the smart, smooth, curved furniture is presented in pear wood décor.

Unrivalled aerodynamics combined with low weight and a low centre of gravity give the ERIBA remarkable road holding and maneuverability.

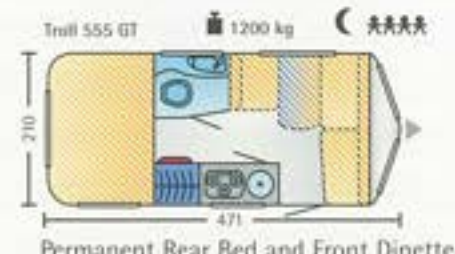

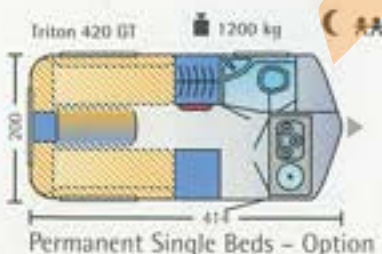

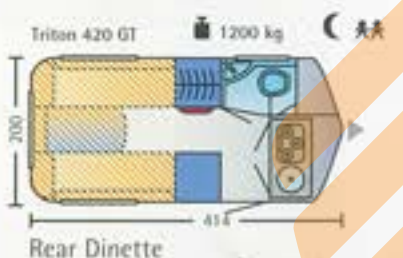

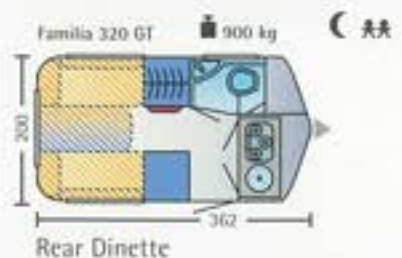

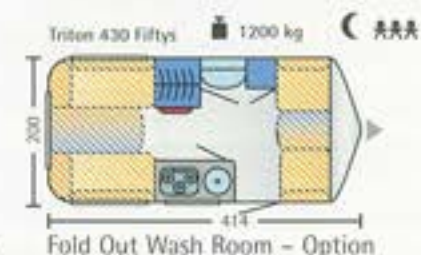

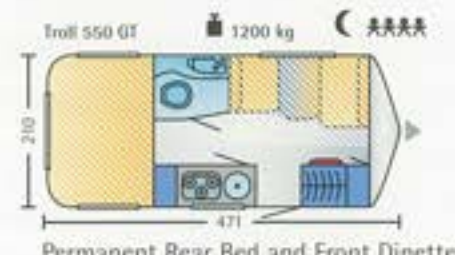

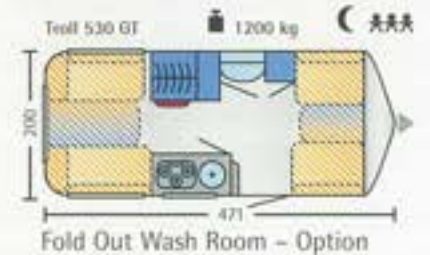

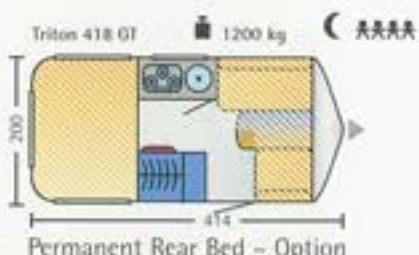

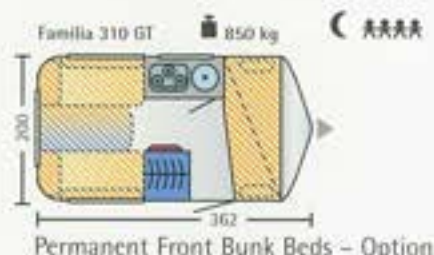

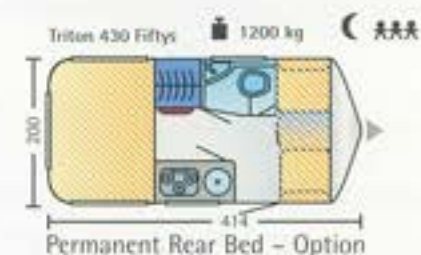

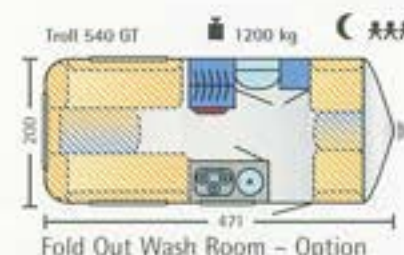

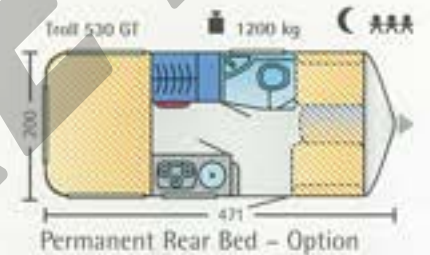

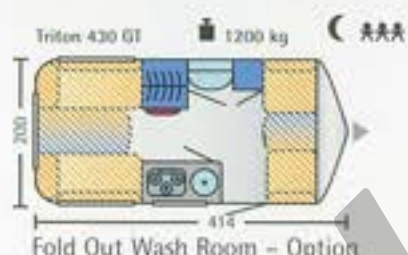

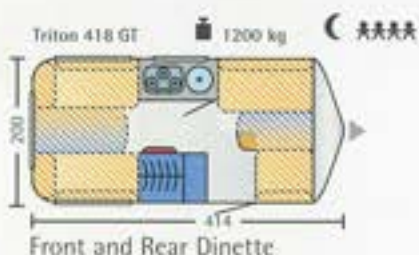

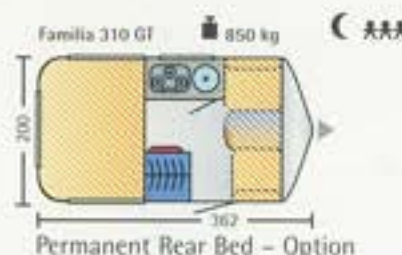

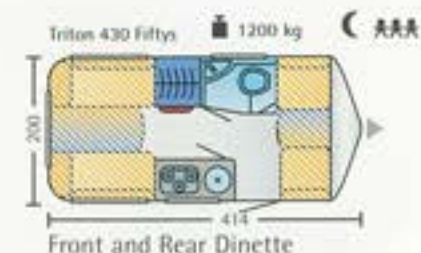

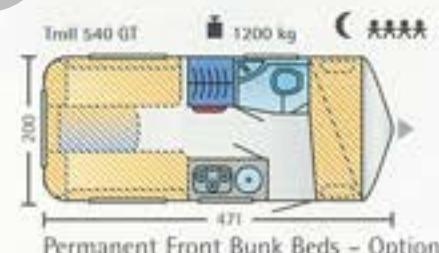

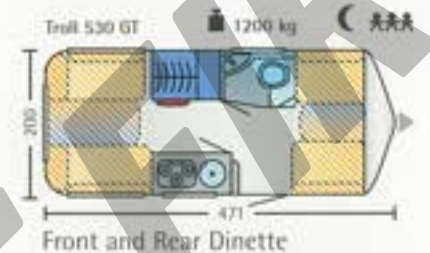

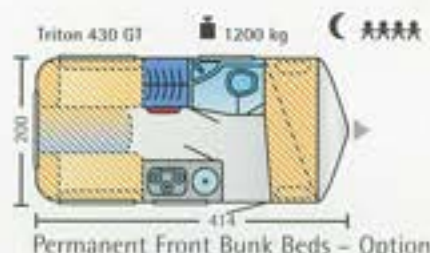

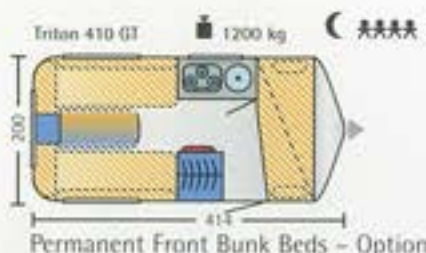

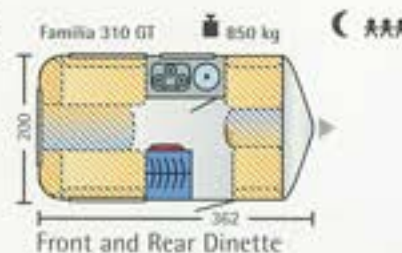

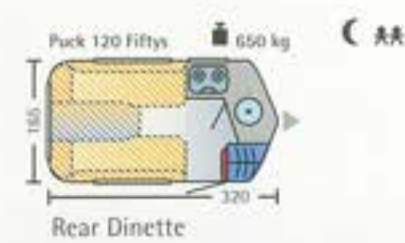

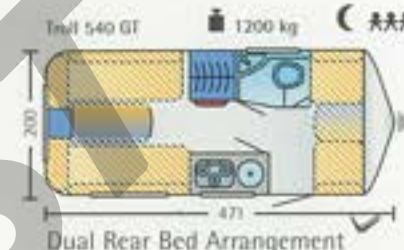

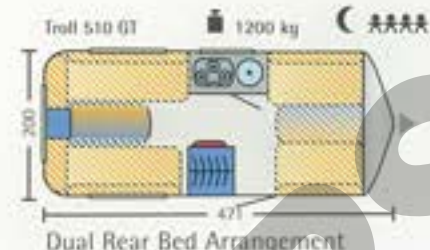

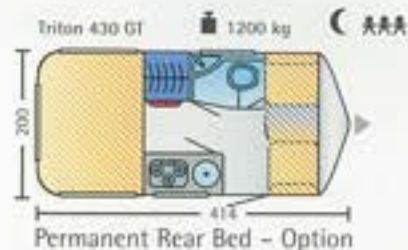

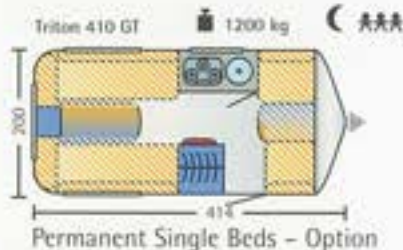

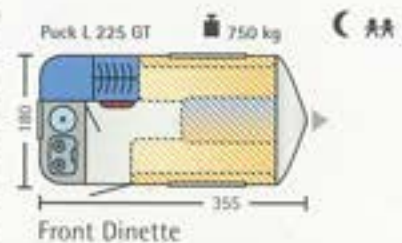

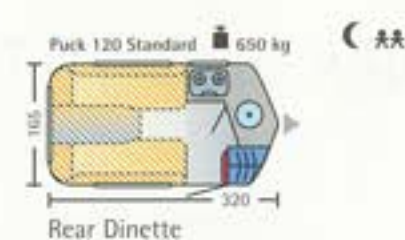

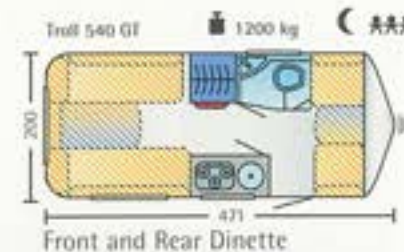

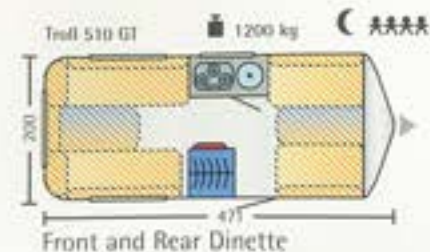

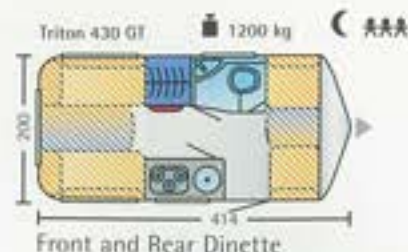

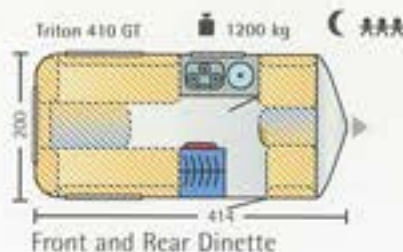

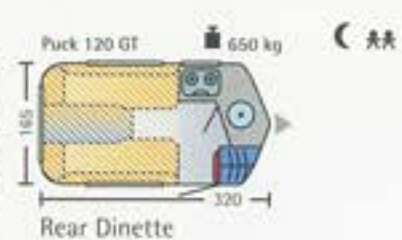

To the left, the rear light unit of the Touring Puck 120 & Touring Fifty's

Above shows a standard model with wheel trims.

The integral gas bottle locker is a feature of all the Touring models.
